

Financial Modeling

Every business we have encountered utilizes Microsoft Excel or Google Sheets in some capacity. We mastered both applications to help businesses with formulas, pivot tables, and automating tasks.

View Our Financial Models

To see our work, click the button labeled, “See our Work”, at the bottom right of the pdf. The button will take you to our Microsoft Excel file, “Excel Help” located on our One Drive. To use the workbook and see our financial models, please do the following:

1. Click, “See Our Work” located at the bottom right.
2. On the Excel File that pops up, click, “File” and “Save As”
3. Click, “Download a Copy”. This should save the workbook to your downloads.
4. Open the downloaded file and click, “Enable Editing” followed by “Enable Content”.
5. Use each of the sheets as directed. Please note, the “WorkChores” image has a link back to our site.

If you are using a Mac, you may experience some glitches with certain formulas, pivot tables, and coding.
